

y-axis

$$3x - 2y = 15$$

$Q(0, 5)$

x-axis

$P\left(-\frac{15}{2}, 0\right)$

A Cartesian coordinate system with a horizontal x-axis and a vertical y-axis. A blue line is plotted, passing through two points marked with blue dots. The first point is on the x-axis, labeled P(-15/2, 0). The second point is on the y-axis, labeled Q(0, 5). The equation 3x - 2y = 15 is written in the upper right quadrant of the graph.
